

# WELDING AND METAL FABRICATION TECHNOLOGY CERTIFICATE OF APPLIED SCIENCE

Welding is a fall start program only. See an advisor for more information.

The welding industry offers workers immediate tangible rewards for their efforts. Few professions allow the opportunity for creativity found in the fabrication shop. In addition, the fabrication industry represents one of the largest employment segments in our local economy. Graduates find work in structural and steel fabrication shops and with heavy equipment rebuilders and manufacturers, mining, refineries, and other energy related enterprises in the region. See our website at [www.msubillings.edu/careers](http://www.msubillings.edu/careers) for graduate data.

## Upon successful completion of this program a student will be able to:

- Conduct and present a job safety analysis
- Set up and operate various cutting and welding processes
- Operate machinery common in welding environment
- Construct basic sketches and blueprints
- Evaluate lab work and projects for acceptability within limits of applicable welding codes
- Weld ferrous and non-ferrous metals in all positions with a variety of welding processes current with the welding and energy industry
- Apply welding metallurgy to weldments
- Apply inspection and testing methods to weldments
