

WELDING AND METAL FABRICATION TECHNOLOGY CERTIFICATE OF APPLIED SCIENCE

Welding is a fall start program only. See an advisor for more information.

The welding industry offers workers immediate tangible rewards for their efforts. Few professions allow the opportunity for creativity found in the fabrication shop. In addition, the fabrication industry represents one of the largest employment segments in our local economy. Graduates find work in structural and steel fabrication shops and with heavy equipment rebuilders and manufacturers, mining, refineries, and other energy related enterprises in the region. See our website at www.msubillings.edu/careers (<http://www.msubillings.edu/careers/>) for graduate data.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate safe work practices in the welding and metal fabrication environment.
- Interpret blueprints and apply appropriate construction methods.
- Successfully weld ferrous metals in all positions with a variety of welding processes.
